

# Built to Grow With You

At Axon, we believe your packaging equipment should grow with your business. Whether you're automating for the first time or scaling to meet high-speed, multi-line production demands, our applicators and heat tunnels are built to evolve with you. Wherever you are on your journey, Axon is more than an OEM—we're your long-term production partner.

CONTACT US

## Shrink Sleeve and Tamper Band Applicators

### EZ-Series

LOW SPEED

Entry-level applicator. One cutting assembly handles the full range of film widths—ideal for first-time automation.

Ø Range: 11-250mm

### 150SL

LOW-MEDIUM SPEED

Compact mandrel sleeve for growing operations. Budget-friendly with flexible capability —designed for craft beer, now scaled for mainstream production.

Ø Range: 30-125mm

### Aurora®

MEDIUM-HIGH SPEED

Designed for mid-to-high-speed applications with advanced technology and flexible configuration options.

Ø Range: 30-125mm

### Aurora® Wide

MEDIUM-HIGH SPEED

High-speed solution for large-diameter applications. Ideal for twin packs, tubs, and other oversized formats needing wider film range.

Ø Range: 75-250mm

### HydroTech™

MEDIUM-HIGH SPEED

Patented applicator originally developed for ice cream production. Delivers hygienic, high-speed tamper banding and full washdown capability.

Ø Range: 35-187mm

## Shrink Application Styles

# AXON<sup>®</sup> Heat Tunnels

Engineered to match your sleeve application needs from entry-level banding to high-speed, high-pressure shrink performance.

INFRARED

## ThermoRay<sup>®</sup>

Compact, cost-effective, entry level tunnel for tamper bands. Ideal for sauces, dressings, and small containers—precise digital controls and high throughput.

**Size Range:**  
Up to 75mm wide

CONVECTION

## EZ-SRB

Versatile convection tunnel for sleeves and bands. "One size fits all" design with wide opening and digital controls—ideal for mixed container types.

**Size Range:**  
Up to 150mm wide\*

\*Custom tunnels available for larger sizes

STEAM

## ThermoFlow

Entry-level steam tunnel with low-pressure design. Self-contained, tool-less changeovers—perfect for first-time steam users.

**Size Range:**  
Up to 150mm wide  
Up to 300mm tall

STEAM

## HE-500

Mid-range steam tunnel with clean operation. Self-contained generator minimizes vapor release—designed for sensitive plant environments.

**Size Range:**  
Up to 125mm wide  
Up to 225mm tall

STEAM

## ThermoPoint<sup>®</sup>

External steam source handles complex shapes like trigger sprays, shrink-over-cap applications, and sparkling wine bottles.

**Size Range:**  
Up to 150mm wide  
Up to 380mm tall

### Built in the USA

All Axon equipment is engineered and assembled at our facility in Raleigh, NC—ensuring high-quality craftsmanship, responsive service, and short lead times.

### More Than an OEM

We don't just sell machines—we work with you to optimize performance, streamline changeovers, and adapt to your evolving production goals.

### Scalable Technology

From single-line startups to complex, high-throughput operations, Axon's product line supports a wide range of speeds, sleeve types, and container sizes.

### Industries Served

- Food & Beverage
- Wine & Spirits
- Dairy & Ice Cream
- Nutraceuticals & Pharma
- Personal Care
- Household Products
- E-Commerce
- Contract Packaging
